I. Introduction

The JMG Student Site Check-In Application is a service that aims to automate the process of JMG students notifying teachers of their attendance at an event outside of school that is counted towards course credit. This is a capstone project for Elijah Caret, Michael Ferris, Xingzhou Luo, and Spencer Morse in partial fulfillment of the Computer Science BS degree for the University of Maine.

1. Purpose of the Document

The purpose of this document is to process the product requirements into a more detailed format and capture the details of the software user interface into a written document. The content within this document will include the user interface design standards within the system, a walkthrough of the user interface, a description of the data items that will be used in the system, and any report formats used if any.

2. References

See “*System Requirements Specification*”, “*System Design Document*”, and “*User Interface Design Document*” for further information.

Appendix A: Agreement between Customer and Contractor

By signing this document, all parties agree that this is a complete list of critical reviews for the JMG Student Check-in Site application.

In the case that critical reviews or any other information in this document need to change for the contract to be fulfilled, the following procedure will be followed: The party that believes a change is necessary shall contact the other party, explaining the situation. A meeting between the two parties will be held to discuss the problem and possible solutions. Once an agreement has been reached, modifications to this document will be made to reflect it, and all members of each party will sign the new document, which will then replace this one.
